

Dry Inedible Animal Products NOT Intended for Animal Feeding

Taiwan has notified WTO of the following requirements for dry inedible animal products not intended for animal feeding (examples of these products are feathers and dried skin) exported from countries/regions free of:

- Foot-and-mouth disease
- Rinderpest
- Bovine contagious pleuropneumonia
- High path avian influenza
- Exotic Newcastle disease
- Glanders:

1. Transport with shipping container or clean container.

2. If transshipped through countries not free from the aforementioned animal diseases, the products shall be transported with container and the container should be sealed with numbered seal. The integrity of the container and the seal should not be compromised during importation.

***3. A certificate in English issued by the quarantine authority of the exporting country shall be accompanied with each consignment and shall state the followings;

1. Type of products, number of the packages and net weight.
2. Date, place, and authority of issuance of the certificate, and the name and signature of the veterinary officer.
